Skyfire

The financial stack for the machine economy

Machines can act like humans,now they need a financial system.

Machines aren't served by today's financial system

The Future Is…

Interconnected

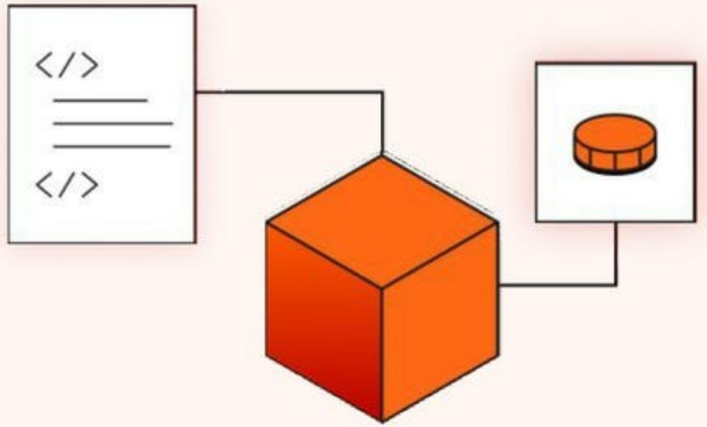

AI will identify themselves and pay for APIs and information.

On Demand

AI and enterprises will perform economic activities with microservices as needed.

Instant

Payments will break through the traditional card / subscription models.

Traditional systems won't cut it

- Machines don't have govt IDs
- No instant, micropayments
- Closed financial systems
- Expensive

Human intervention is required at nearly every step

Cross border, micropayments will be the most common form of value transfer

Massive market opportunity

Solving 3 fundamental problems for machines

Accessing APIs

AI needs to access and pay for API and infra from other AI and traditional services.

Acquiring data

AI needs to automate the access and acquisition of training datasets on demand.

Receiving services

Enterprises need automated low value payin and payout options.

Skyfire is building the financial system for the machine economy starting with identity and micropayments.

Skyfire is the financial stack for machines

CONFIDENTIAL

Platform

- Agent Wallet Service
- Automated Payment Logic
- Integrated On/Off Ramps
- Service Discovery
- Fraud & Compliance

Network Verification

Global interoperability for verified businesses using the Skyfire network and services.

Protocol Layer

Machine operable payment protocol for discovery, negotiation and payment.

Identity

Immutable proof of history and authentication for agents

Ledger

Open and distributed database for information and settlement

On chain machine payments, powered by stablecoins

- Globally Open
- Natively digital and global
- Fully programmable
- Low cost
- Always-on, 24-7

Scalable business model

Near Term Opportunities

Transaction Fee	Platform	On/Off-ramps Currency FX
% Fee charged for every transaction	PaaS fee for businesses using the payment platform	USDC <> FIAT conversion 3rd party on/off ramp rev shares

Future Opportunities

Advanced Ruleset access	Marketplace Services	Compliance	Factoring
SaaS cost for advanced payment rules and accept logic	Index listing, verification and promotional services	Additional compliance screening and rules engine	Financing for future receivables based on payment record
