AI POWERED

Product Management

Brian

Ex sr. eng manager & lead eng
@ Google, Slack and Palantir

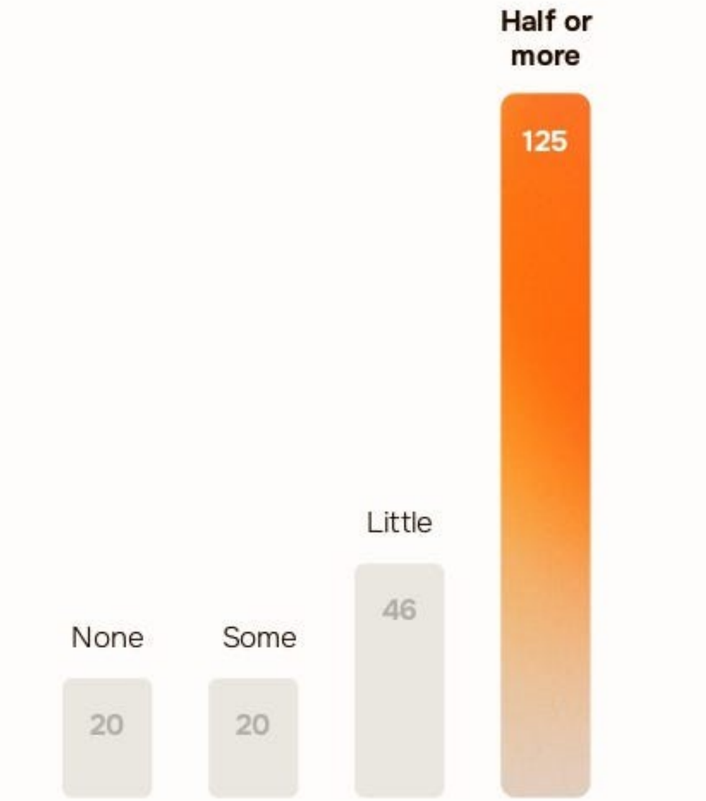

Ishwar

Ex lead PM @ Google Maps
VP of Product & Eng @ Funding Societies

...but time and time again, we encountered the same problem

PMs are paid $300k+ to **drive strategy and innovation**, but end up spending half their time on **low-value, repetitive work**

Time spent on project management tasks

Your Priorities
These are used to help identify tasks. You can edit them at any time.
1 Enhance User Onboarding and Retention
2 Optimize Core Feature Performance
3 Expand Enterprise Capabilities
Recommended tasks
From recent feature requests, meeting notes, bug reports, Slack conversations and more in the last 14 days
1 Enhance User Onboarding and Retention
Redesign User Onboarding Flow
Analysis of recent support tickets shows 40% of new users struggle with initial setup. Ticket #1023 highlights confusion in the current flow.
Open in Intercom
Create Interactive Product Tour
Feedback from onboarding survey (Intercom campaign #ONI-2023) indicates 60% of users are unaware of advanced features within first month of use.
Open in Intercom
Implement Advanced User Segmentation
Marketing team discussion in #go-to-market channel highlights need for better user segmentation to improve feature adoption rates and reduce churn.
Open Slack conversation
2 Optimize Core Feature Performance
Implement Performance Optimization for Data Processing
Multiple threads in #customer-feedback channel report slow performance when handling datasets over 1GB. User @john_doe mentioned considering a competitor due to this issue.
Open Slack conversation
Implement AI-assisted Insights Feature
Discussion in #product-roadmap channel about leveraging AI to provide more value to users. This aligns with CEO's vision shared in all-hands meeting.
