PARADIGM SHIFT

AI is the most disruptive paradigm shift to how we work that today's professionals have ever experienced. **A transformation in how we work requires a transformation in how we learn.**

//

44%

Morgan Stanley estimates AI will impact 44% of workers in the next 3 years

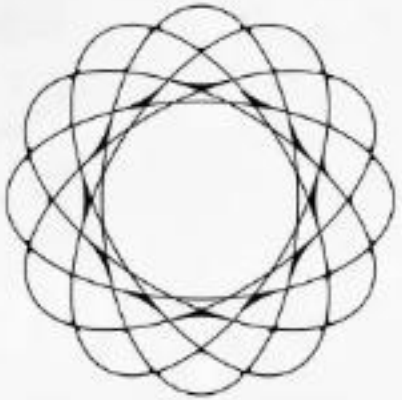

75M to 80m workers in the US alone are racing to figure out 1) how AI will impact what they do and 2) where they can get the skills to at least keep up (and ideally take advantage).

PROBLEM

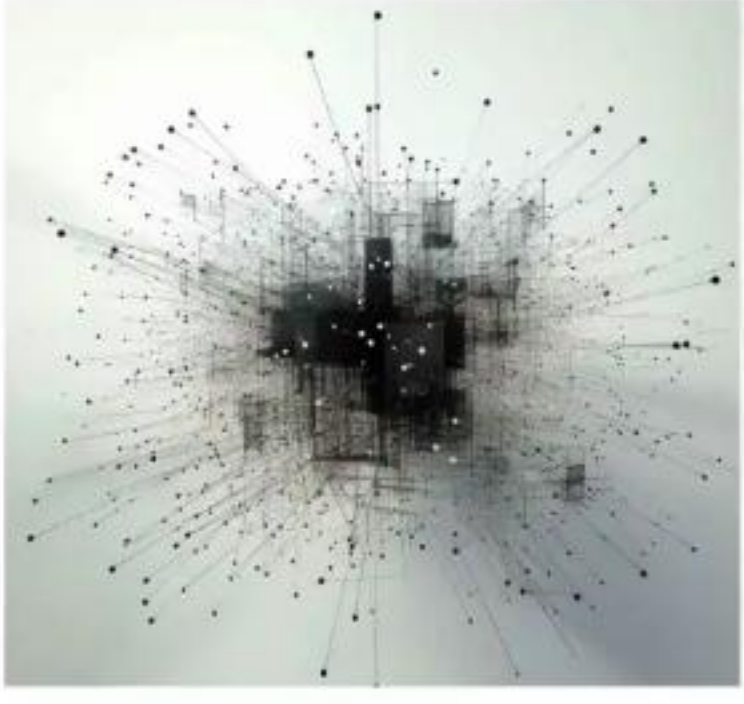

TODAY'S EDUCATIONAL RESOURCES DON'T MOVE AT THE SPEED OF AI

Copious digital AI courses exist, but:

1. they're **hyper-fragmented** across platforms
2. there is extremely **low signal:noise**, frustrating would-be learners who don't know where to begin
3. they're incomplete and/or **out of date** almost as soon as they're published

The half-life of AI educational resources is shorter than any other knowledge domain in history.

MEET SUPERINTELLIGENT

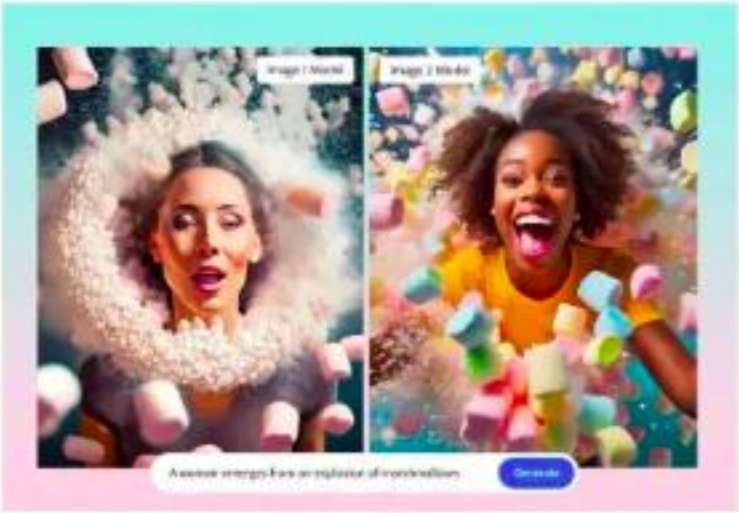

Education that moves at the speed of AI

Superintelligent is a new learning platform for an era where what you need to know changes faster than ever before.

Rapidly-Updated Microcourses
Resources for learning what came out last week, not last quarter.

Applied Learning Communities
Challenges and tutorials that get people **doing**, not consuming.

Real-World Case Studies Library
An ever-expanding case study library to help people apply AI

EXAMPLE

ADOBE FIREFLY IMAGE 2

MICROCOURSES/TUTORIALS

Within 24 hours of a launch, the first tutorials appear on Superintelligence

LEARNING COMMUNITY

In the community, challenges are posted to help learners test Image 2 compared to Midjourney and DALL-E 3. People share their results.

REAL WORLD CASE STUDIES

Superintelligent aggregates the Twitter threads, YouTube videos and other public resources showing Image 2 best practices and ideas.

A **learning paradigm shift** from knowledge you can acquire once and update occaisionally to a continuous stream of new skills to learn necessitates a business model shift as well.

From **buying online courses** *to* **subscribing to a learning stream**

Superintelligent

GO TO MARKET

Trust through content

Superintelligent has an initial **top-of-funnel** and **brand trust** through The AI Breakdown, the #1 AI podcast.

This strategy can be expanded to incorporate a new generation of AI edu-influencers who double as content creators and marketers.

MOATS

Brand Moat

Liquid Death for AI Education // A brand that makes people *want* to learn with us

Network Moat

Shared learning community creates a light network effect on the platform

Model Moat

Subscription inherently stickier than one-off courseware

MEET NLW

EDUCATION

Former Principal at Learn Capital; Founder of Northwestern University Center for Global Engagement, which led to the then largest donation ($100M) in university history from Bertie Buffett.

CONTENT

Host of crypto's most popular daily news podcast, and now host and creator of the highest ranked pure AI podcast.

BRAND

Masterminded FTX's brand strategy as Head of Marketing (which was unfortunately very successful)
