Retail Investors have just lost a lot of money (again)

So have the so called ‘experts’.

Why don’t they work together to make better investment decisions?

that’s pynk

Problem

Individuals - whether amateurs or professional fund managers - cannot outperform the market over a consistent period of time.*

Retail investors pay high fees for a poor product, while the fund managers take home a handsome profit.

pynk Source: *Aei

Solution

Rather than rely on any one individual subject to bias, we take the predictions and forecast data of tens of thousands from across the world.

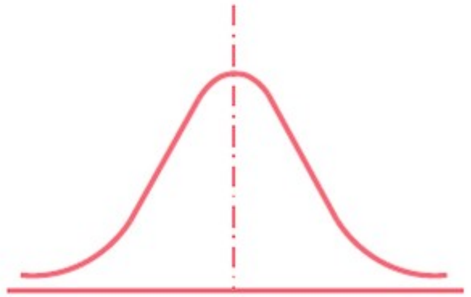

Our AI then identifies who to listen to, at any point in time, for any given asset.

This creates the world's first Wisdom IN Crowds™ managed portfolio.

(oh, and it's 0% fee!)

pynk

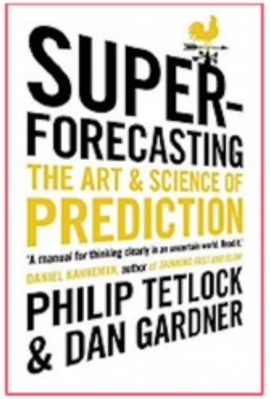

Pynk uses AI to find the Wisdom in Crowds

1. The Wisdom of Crowds

1906 - Sir Francis Galton

Takes a crowd of predictions and uses the average to remove bias.

2. Super Forecasters

2011 - The Good Judgement Project

Pays more attention to a proven group of generalist 'Super Forecasters' to gain even more accurate predictions.

3. Wisdom IN Crowds™

2020 - Pynk

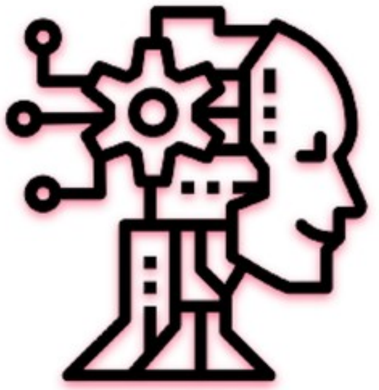

Pynk uses AI to remove noise & bias from a crowd, identifying the correct users dynamically for any given scenario in real-time

pynk

How Pynk Deploys Wisdom in Crowds

1. Our 33,000+ users in 180+ countries contribute predictions via our gamified app*.

2. Our AI 'Rose' analyses user predictions to predict future market prices.

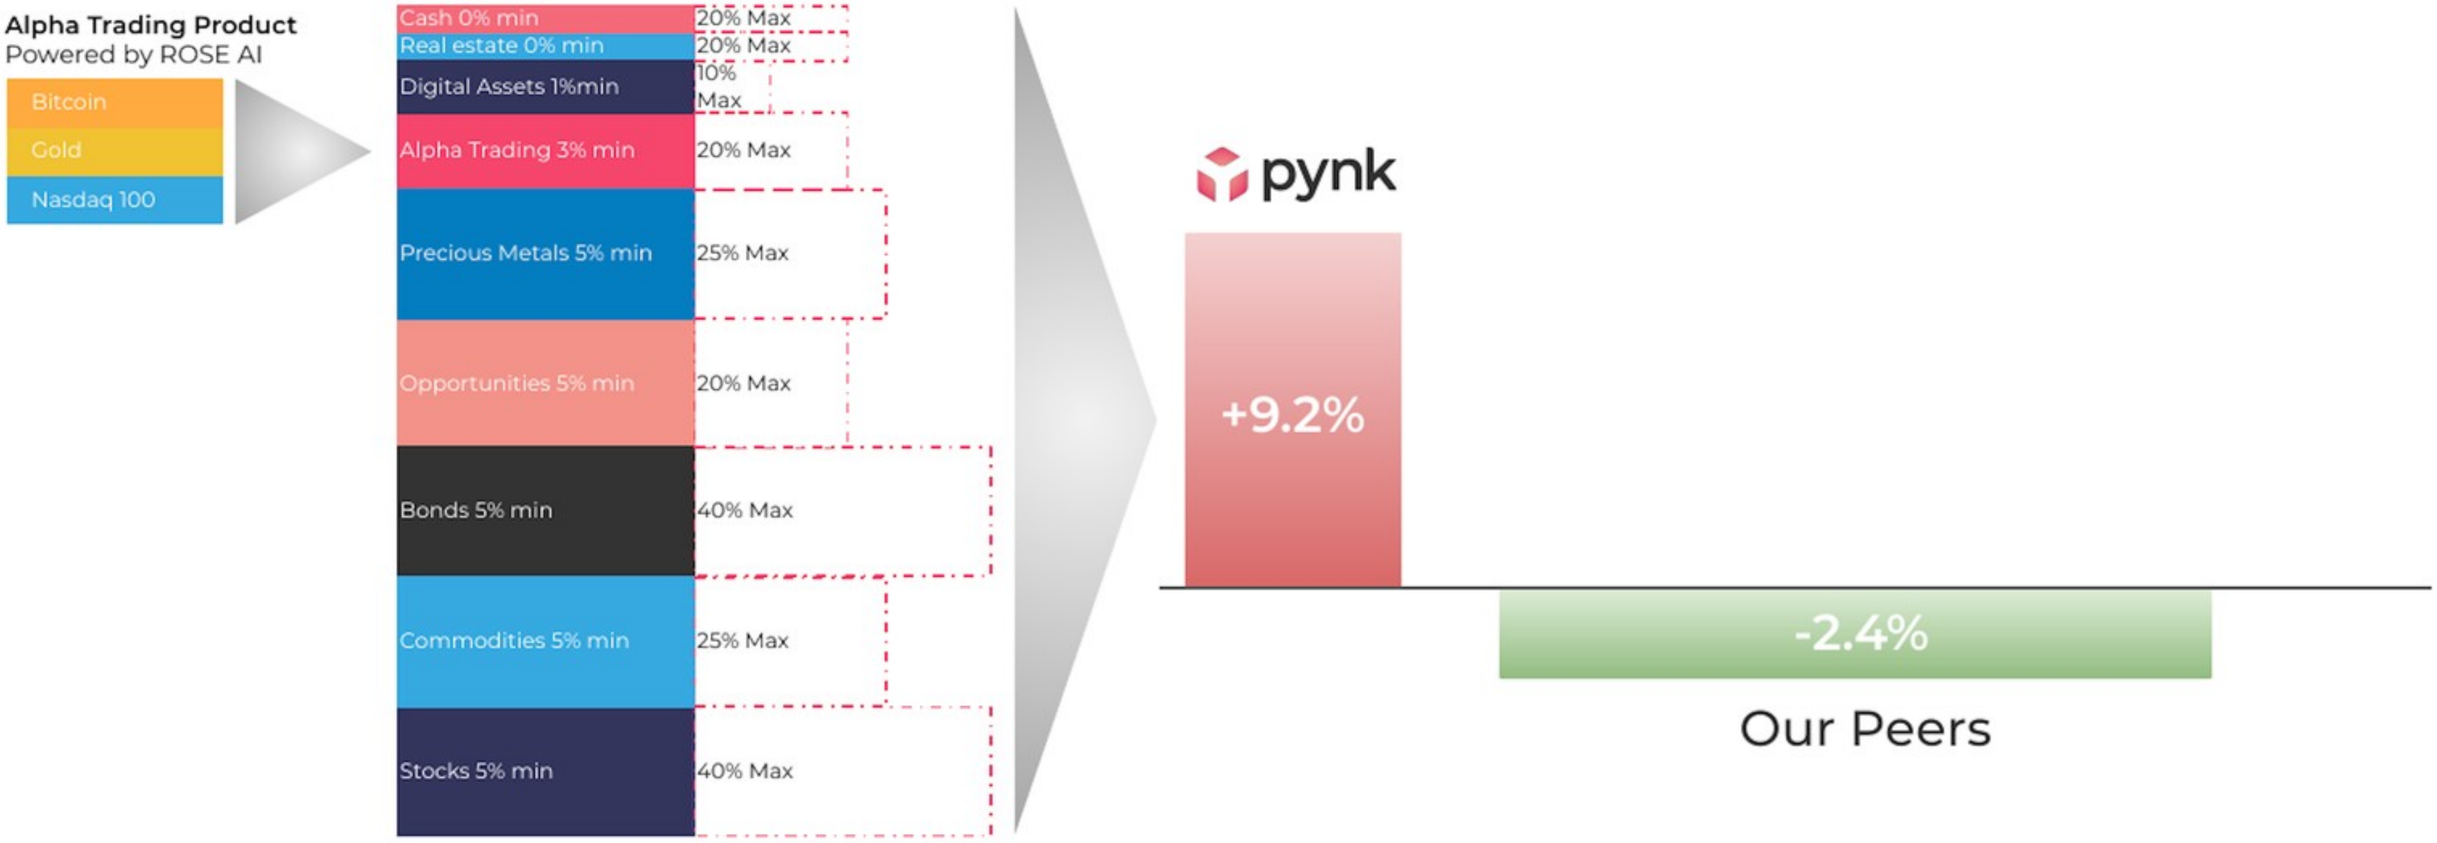

3. If the prediction data, AI and Investment Committee are in agreement - the portfolio is adjusted accordingly.

pynk *New UI design coming Q2 2020

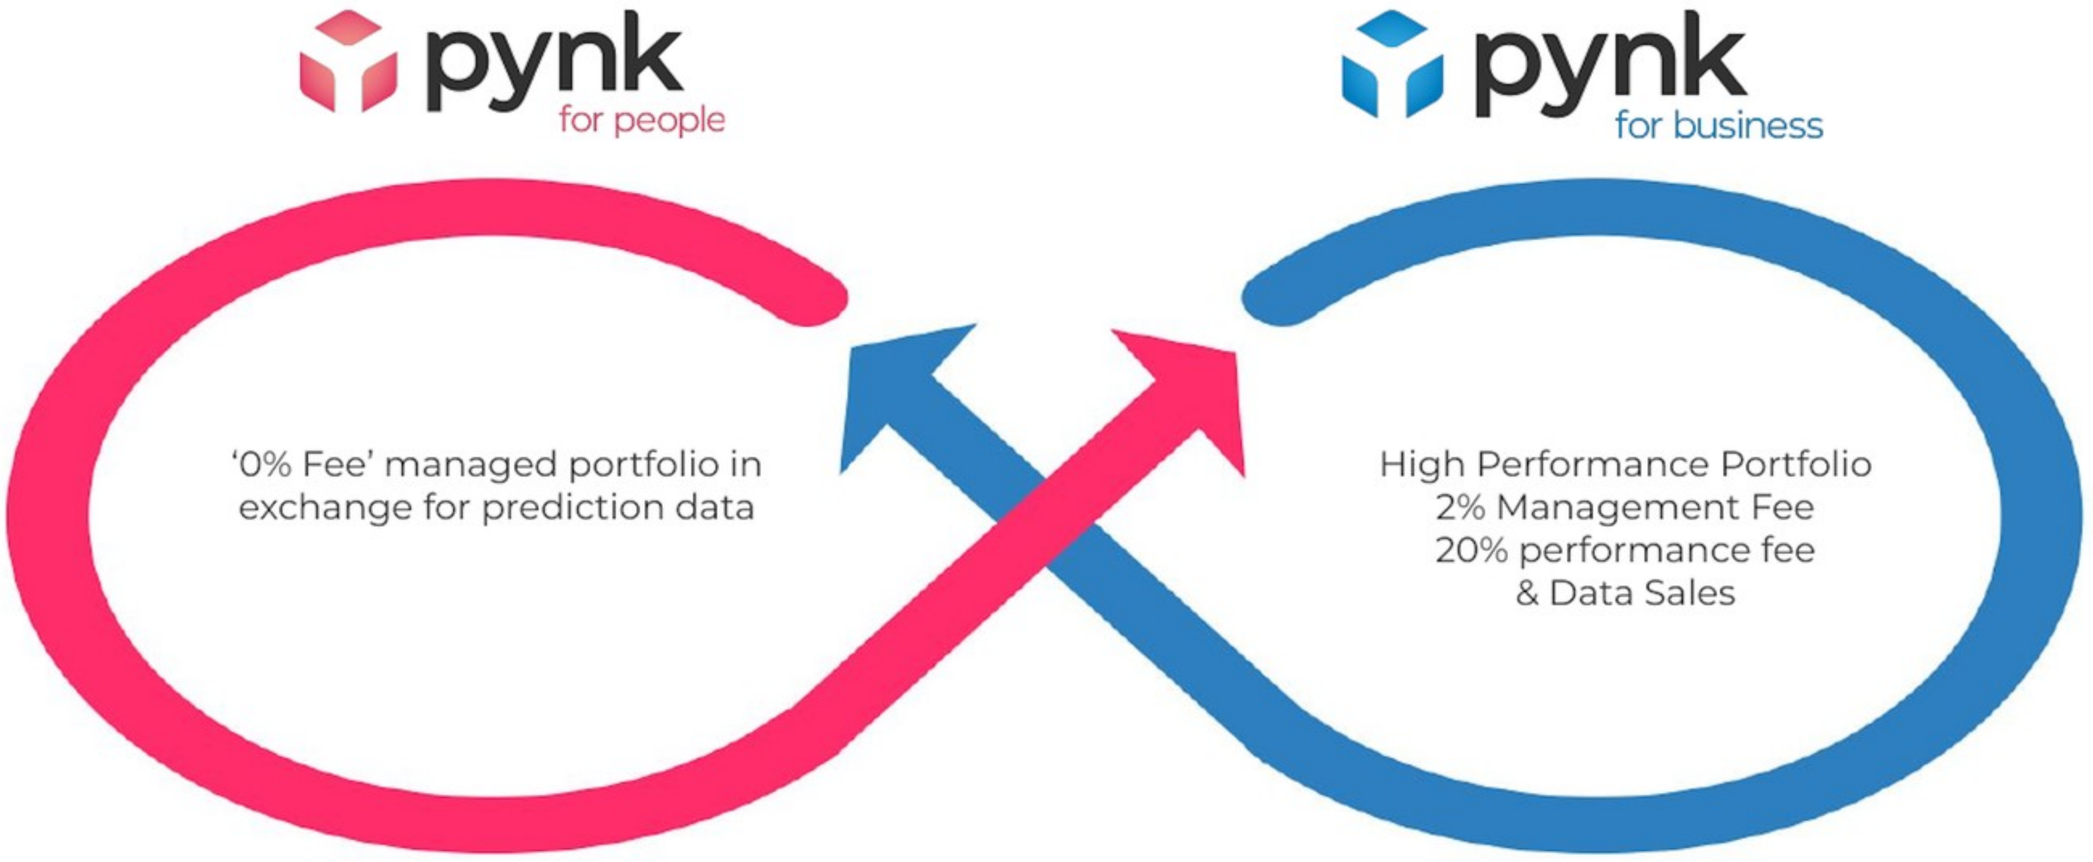

Retail Investment Product (+9.2% YTD)

Fully managed and diversified portfolio, designed for Retail Investors. Performance since inception Jan 2019 +18.8%. Launching Nov 2020.

Source: *Nutmeg, Scalable, Money Box YTD performances (1st Jan - Jul 31st 2020) averaged and based on representative portfolio allocation according to their websites.*

The Model

Pynk's business model is a symbiotic financial system between retail investors and large institutions

pynk

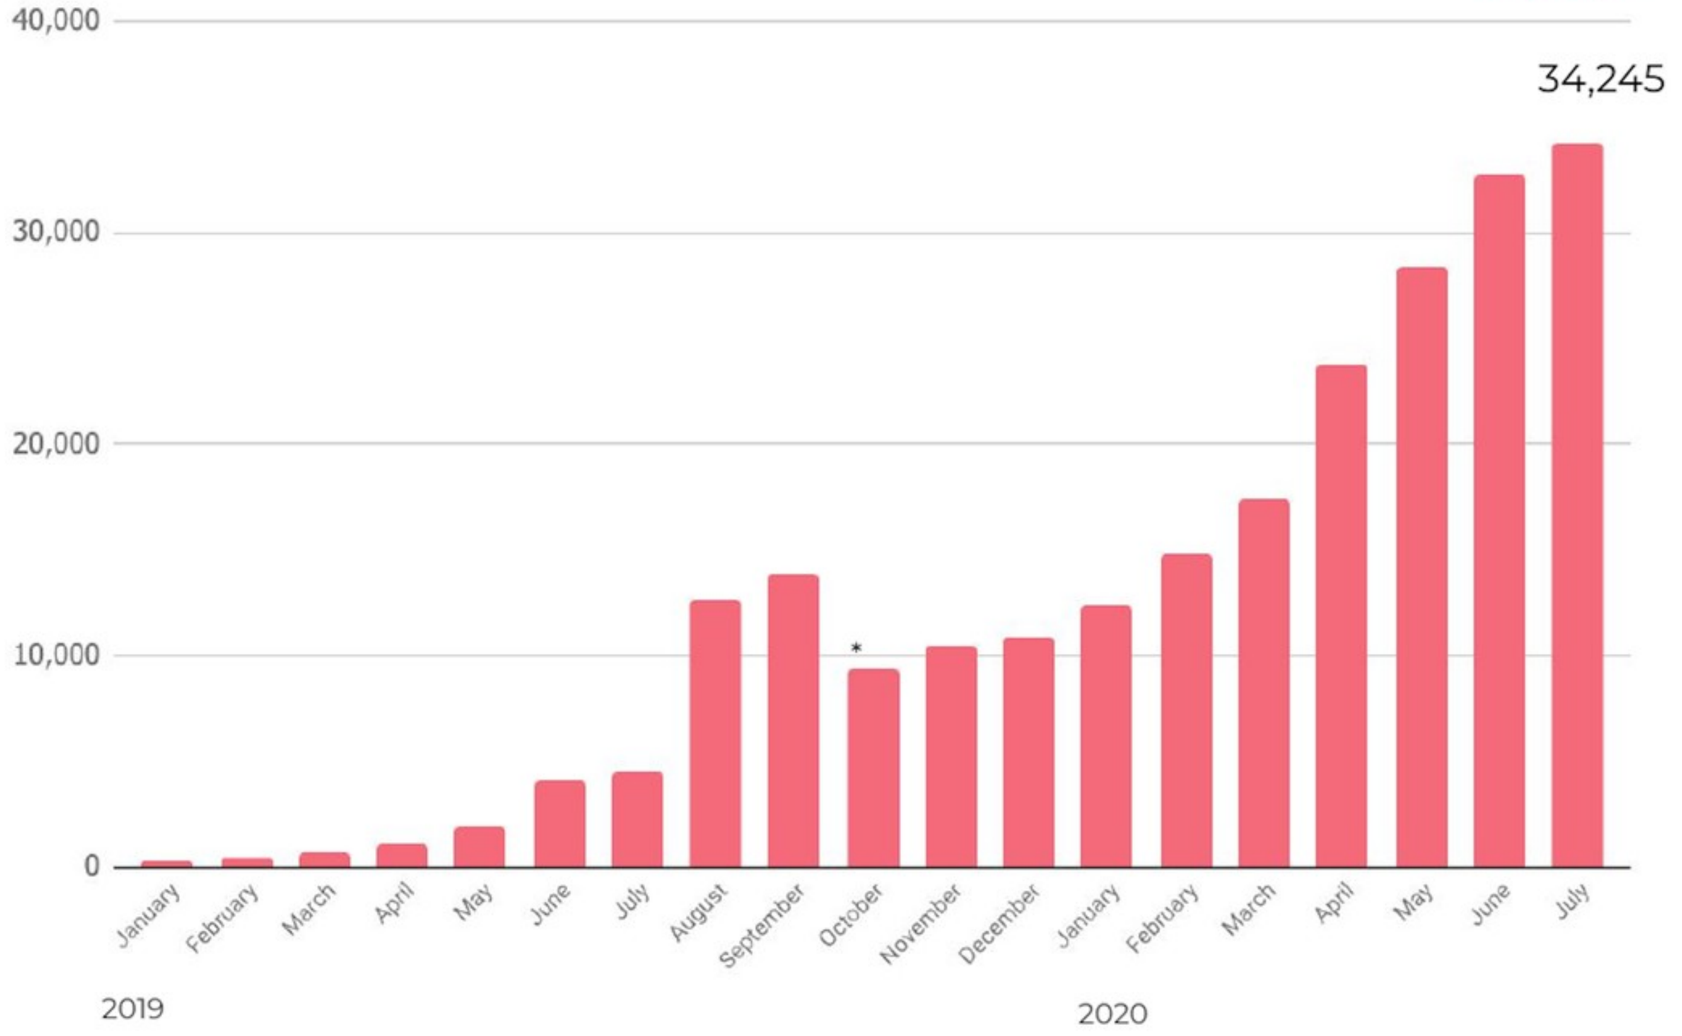

B2C Traction

Crowd Sentiment Gold Investment

pynk for business

Pynk's crowdsourced prediction data in conjunction with Lucena Research's statistical machine learning algorithms unlock insight into the gold market. This single asset long-short model portfolio intelligently harnesses wisdom of the crowd to generate directional trading signals for the price of gold, and is available exclusively on Lucena's QuantDesk platform.

Historical Performance (April to July, 2020)

*Backtest simulation - past performance is not indicative of future returns.

Benchmark Relative Return	5.31%	**Sharpe Ratio**	4.91
Beta	0.45	**Volatility**	0.71%

The Data

Model ingests crowd voting sentiment daily and predicts a one week forward gold price sentiment. Super-users identified via proprietary statistical clustering and filtering technology.

Top Features used by the Model:

Directional Price Change
Binary values indicating true bullish or bearish seven day changes in gold price.

Prediction Price
The price of gold forecasted by a user seven days in the future.

Engagement
A measure of user historical prediction frequency.

Daily Engagement
A measure of the average number of super-users active per day.

Historical Performance
Metrics to evaluate user performance in predicting directional price changes, such as Matthew's correlation coefficient.

Percentile Threshold
The acceptable lower bound of performance for defining who

The Team

Our team brings a broad mix of startup and corporate experience, multiple exits, advanced AI and quant systems powering billions of dollars a day for global banks, and fund management of multi billion $ AUM over the course of 3 economic downturns.

pynk *New UI design coming Q2 2020

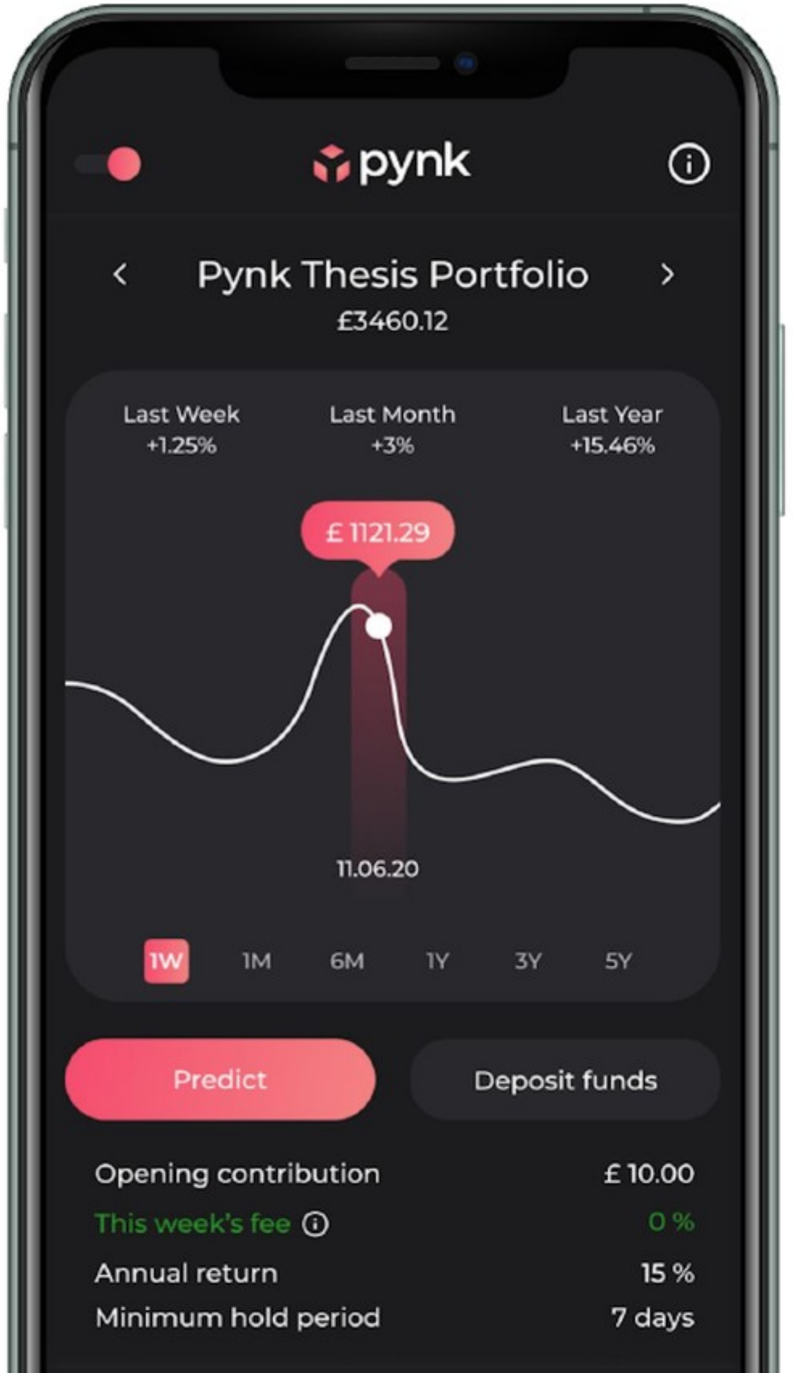

Product - Investor side

Everyday investors invest via the Pynk Wallet (launching Q4 2020).

In order to qualify for 0% fee investing, users must make at least one price prediction per week.

Those that do not predict are automatically charged a weekly fee (annual fee for non-predictors 1.44%)

In this way, everyone who invests is incentivised to contribute to the Pynk 'Crowd Wisdom' system.

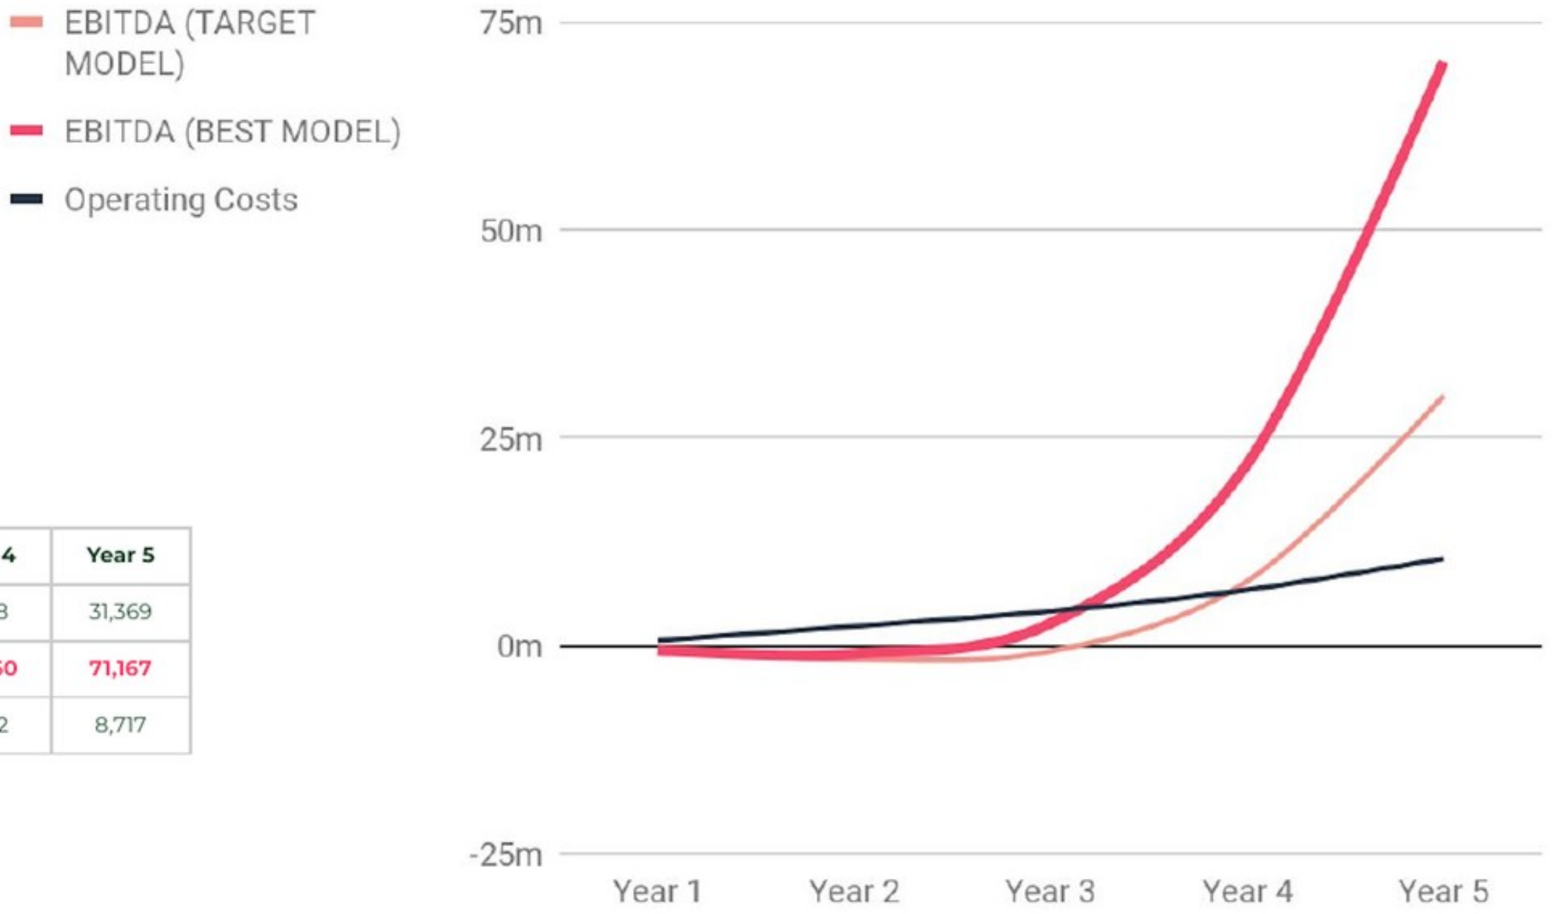

pynk *New UI design coming Q2 2020

Financial Plan

Unlike other Wealth Management Platforms who rely solely on AUM - we enjoy multiple revenue streams, allowing us to scale quicker than competitors.

Roadmap

pynk

Exit Strategy

Fintech is a young and rapidly evolving sector, with valuations often based on future potential. Our approach is to build a company with robust revenues today, easing capital raises in light of new market conditions.

There will be several opportunities for investors to exit along this journey as larger funding partners come in.

The Pynk team plans to IPO in 7-9 years.

pynk
